

Stage 1 Fire Restrictions

Fire restrictions help land management agencies reduce fire risk & prevent wildfires during periods of HIGH to EXTREME fire danger.

CAMPFIRES are prohibited except in approved recreation sites as designated on the specific agency's fire restriction order. Liquefied Petroleum Gas (LPG) stoves that can be turned on and off are allowed in areas clear of flammable materials.

SMOKING is prohibited outside of vehicles, buildings, and developed recreation sites, unless in a 3-foot-diameter area cleared of burnable vegetation.

Most wildfires are person-caused. Thank you for doing your part to prevent wildfires this season!
